Potato, sweet (slips)			[Planting period]									
Pumpkin			[Planting period]									
Radish	[Planting period]								[Planting period]			
Shallots									[Planting period]			
Spinach (seeds or transplants)		[Planting period]							[Planting period]			
Squash, summer			[Planting period]					[Planting period]				
Squash, winter			[Planting period]					[Planting period]				
Tomatoes (transplants)			[Planting period]				[Planting period]					
Turnip		[Planting period]						[Planting period]				
Watermelon			[Planting period]				[Planting period]					

Average last freeze March 16

Average first frost November 16

Plants grown in winter will benefit from protection during freezing weather  
Plants grown in late summer will benefit from shade cover during establishment

.= marginal planting dates

Note: Planting date can vary based on soil temperature and first and last freeze dates.
